Experience

Scandinavian Good Business AB Fullstack Developer

2024 - 2025

- Developed scalable and secure RESTful APIs in Laravel and Symfony, integrating third-party services like Capway and Zoho Invoices
- Designed interactive, real-time interfaces using JavaScript ES6 and GoJS for dynamic, responsive canvases.
- Led frontend UI design using vue bootstrap, optimizing user interactions to enhance experience and meet business needs.

Inriver - Incorporated Fullstack Developer

2022- 2024

- Developed Node.js APIs, including ETL transactions, to streamline data processing and integration
- Responsible for processing and displaying ETL data using Vue.js and the Nuxt framework, ensuring seamless frontend integration.
- Implemented CI/CD pipelines with Azure DevOps to improve deployment, automation, and workflow

Envireau Pacific Incorporated Fullstack Developer

2019- 2022

- Create "Accounting Collection System" using Vue and Laravel. Crucial for tracking client accounts, managing payments, and monitoring payable aging in the accounting department
- Build "Sales Dashboard Monitoring" to track product movement, generate monthly sales reports, and set sales targets.
